Contents

Chapter 1	Properties of Matter	1.1 - 1.59
1.1	Introduction	1.1
1.1.1	Elasticity	1.1
1.1.2	Stress and strain	1.1
1.1.3	Elastic moduli	1.3
1.1.4	The Young's modulus	1.3
1.1.5	Hooke's law	1.4
1.1.6	The variation of stress and strain (stress-strain diagram)	1.5
1.1.7	Elastic energy stored in a stretched wire	1.7
1.1.8	The bulk modulus (K)	1.12
1.1.9	The rigidity or shear modulus (N)	1.12
1.2	Poisson's Ratio	1.13
1.2.1	Expressions for E , K and N in terms of α and β	1.15
1.2.2	Relation between the three moduli of elasticity E , K and N	1.15
1.2.3	Some important points concerning moduli of elasticity (E , N and K)	1.16
1.3	Factors Affecting Elasticity	1.19
1.3.1	Working stress and factor of safety	1.20
1.4	Bending of Beams	1.21
1.4.1	Expression for bending moment	1.22
1.4.2	Depression of the free end of a cantilever-theory	1.24
1.4.3	Bending of a cantilever - experiment	1.26
1.4.4	Non-uniform bending - theory	1.27
1.4.5	Non-uniform bending - experiment	1.28
1.4.6	Uniform bending - theory	1.29
1.4.7	Uniform bending - experiment	1.31
1.4.8	Workdone in bending of a cantilever	1.33
1.4.9	Application to girders (I-shaped girders)	1.33
1.5	Twisting Couple on a Cylinder (or Wire)	1.39
1.5.1	Workdone in twisting	1.41
1.5.2	Shafts	1.42
1.5.3	Comparison of hollow shaft with solid shaft	1.42
1.6	Torsion Oscillations - Theory	1.43
1.6.1	Formulae for moment of inertia	1.45

1.6.2	Experimental determination of Rigidity modulus of a wire and Moment of inertia of a body by Torsion pendulum . . .	1.46
1.6.3	Moment of inertia of an irregular body	1.47
1.7	Conclusion	1.51
	Short Questions and Answers	1.53
	Review Questions	1.58

Chapter 2 Acoustics and Ultrasonics 2.1 - 2.91

2.1	Introduction	2.1
2.2	Classification of Sound	2.1
2.2.1	Musical sound	2.2
2.2.2	Noise	2.3
2.3	Characteristics of Musical Sounds	2.3
2.3.1	Pitch or frequency	2.3
2.3.2	Loudness or intensity	2.4
2.3.3	Expression for intensity	2.5
2.3.4	Measurement of intensity level-decibel	2.6
2.3.5	Sound pressure level	2.7
2.3.6	Phon	2.8
2.3.7	Weber-Fechner law	2.9
2.3.8	Sone	2.9
2.3.9	Factors affecting loudness or intensity	2.14
2.3.10	Quality or Timbre	2.15
2.3.11	Musical stone pillars	2.16
2.3.12	Limits of audibility	2.17
2.4	Sound Intensity in a Room	2.18
2.5	Reverberation	2.18
2.6	Absorption Coefficient	2.19
2.7	Sabine's Formula (Growth and Decay of Sound)	2.19
2.8	Measurement of Sound Absorption Coefficient	2.25
2.8.1	Sound absorbing materials	2.27
2.9	Factors Affecting the Architectural Acoustics and their Remedies	2.31
2.10	Requisites for Good Acoustics	2.35
2.11	Applications of Acoustics	2.36
2.12	Ultrasonics	2.37
2.13	Ultrasonic Production	2.37
2.13.1	Magnetostriction Method	2.38
2.13.2	Piezoelectric method	2.41
2.14	Detection of Ultrasonic Waves	2.47

2.14.1	Thermal method	2.47
2.14.2	Piezoelectric or Quartz crystal method	2.48
2.14.3	Kundt's tube method	2.48
2.14.4	Sensitive flame method	49
2.15	Properties of Ultrasonic Waves	49
2.15.1	Cavitation	50
2.16	Velocity Measurement - Acoustic Grating	2.50
2.17	Applications of Ultrasonic Waves	2.54
2.17.1	Engineering / Industrial applications	2.54
2.17.2	Ultrasonic inspection - Non destructive testing	2.67
2.17.3	Inspection techniques	2.68
2.17.4	Scan displays	2.70
2.17.5	Applications	2.72
2.17.6	Advantage	2.72
2.17.7	Limitations	2.73
2.18	Medical Applications of Ultrasonic Waves	2.73
2.18.1	Diagnostic applications	2.74
2.18.2	Therapeutic applications	2.80
2.19	Conclusion	2.81
	Short Questions and Answers	2.82
	Review Questions	2.90

Chapter 3 Thermal Physics 3.1 - 3.86

3.1	Introduction	3.1
3.2	Thermal Expansion	3.1
3.2.1	Salient application related points to remember	3.2
3.3	Thermal Stress	3.9
3.3.1	Force in a bar due to thermal expansion or compression	3.9
3.3.2	Salient points related to thermal stress	3.10
3.4	Expansion Joints	3.12
3.4.1	Bridge expansion joints	3.12
3.4.2	Railway track expansion joints	3.13
3.4.3	Pipe expansion joints	3.13
3.5	Bimetallic Strips	3.13
3.5.1	Applications	3.14
3.6	Thermal Conductivity	3.15
3.6.1	The mechanism of conduction in solids	3.16
3.7	Theory of Rectilinear flow Heat Through a Rod	3.17
3.8	Determination of Thermal Conductivity	3.21

3.8.1	Theory of thermal conductivity of good conductors - Forbe's method	3.21
3.8.2	Forbe's method-experiment	3.23
3.8.3	Theory of thermal conductivity of poor conductors - Lee's disc method	3.26
3.8.4	Lee's disc method - experiment	3.27
3.9	Thermal Conduction Through Compound Media	3.28
3.10	Radial Flow of Heat through the Wall of a Spherical Shell	3.32
3.11	Thermal Insulation of Buildings	3.33
3.11.1	Thermal insulating materials	3.33
3.11.2	Thermal insulation design	3.34
3.11.3	Ventilation	3.35
3.11.4	Comparison between heat conduction and electrical conduction	3.36
3.12	Concept of Quantum Physics	3.36
3.13	Theory of Black Body Radiation	3.37
3.13.1	Stefan-Boltzmann's law	3.38
3.13.2	Wien's displacement law	3.38
3.13.3	Rayleigh - Jean's law	3.39
3.13.4	Planck's quantum theory	3.39
3.14	Thermodynamics	3.41
3.14.1	Zeroth law of thermodynamics	3.42
3.14.2	First law of thermodynamics	3.42
3.14.3	Second law of thermodynamics	3.43
3.14.4	Third law of thermodynamics	3.43
3.15	Application of the First law in few cases of Interest	3.44
3.15.1	Work done by an ideal gas during expansion	3.44
3.15.2	The specific heat capacities of gases	3.44
3.15.3	Isothermal and Adiabatic changes	3.46
3.15.4	Workdone in isothermal and adiabatic changes	3.48
3.15.5	Enthalpy	3.50
3.16	Application of the Second Law in Few Cases of Interest	3.51
3.16.1	Reversible and irreversible processes	3.51
3.16.2	Working of a heat engine (Carnot engine)	3.52
3.16.3	Carnot's cycle as heat engine and refrigerator	3.59
3.17	Carnot's Theorem	3.61
3.18	Concept of Entropy	3.62
3.18.1	Important properties of entropy function	3.64

3.19	Entropy - Temperature Indicator Diagram	3.66
3.19.1	Entropy of perfect gas	3.67
3.20	Actual Heat Engines	3.69
3.20.1	Otto engine	3.69
3.20.2	Diesel engine	3.73
3.21	Conclusion	3.77
	Short Questions and Answers	3.80
	Review Questions	3.86

Chapter 4 Applied Optics 4.1 - 4.98

4.1	Introduction	4.1
4.2	Interference	4.1
4.2.1	Principle of superposition of waves	4.1
4.3	Coherence	4.3
4.4	Young's Double Slit Experiment	4.4
4.5	Analytical Treatment of Interference	4.5
4.6	Michelson Interferometer	4.8
4.6.1	Construction	4.8
4.6.2	Working	4.8
4.6.3	Theory of fringe formation	4.10
4.6.4	Types of fringes	4.10
4.6.5	Uses of Michelson interferometer	4.12
4.7	Antireflection Coatings	4.14
4.7.1	Multilayer anti-reflection coatings	4.16
4.8	Interference at Air Wedge-Experimental Arrangement	4.16
4.8.1	Theory-expression for the diameter of a thin wire	4.17
4.8.2	Determination of thickness of thin wire-experiment	4.18
4.9	Lasers	4.21
4.10	Einstein Theory	4.22
4.10.1	Spontaneous and stimulated emission of radiation	4.22
4.10.2	Einstein's coefficients	4.23
4.11	Amplification of Light	4.27
4.12	Population Inversion-Pumping Mechanisms	4.28
4.13	Optical Feedback (Resonator)	4.28
4.14	Characteristics of Laser	4.30
4.14.1	Monochromaticity	4.30
4.14.2	Coherence	4.30
4.14.3	Directionality	4.31
4.14.4	Brightness	4.32

4.14.5	Lasing wavelength range	4.32
4.14.6	Output power of lasers	4.33
4.15	Laser Systems	4.33
4.15.1	The carbon dioxide laser	4.34
4.15.2	Nd : YAG laser	4.36
4.15.3	Semiconductor lasers	4.38
4.16	Applications of Lasers	4.42
4.16.1	Lasers in metrology	4.42
4.16.2	Lasers in material processing (manufacturing industry)	4.42
4.16.3	Lasers in medicine	4.45
4.16.4	Lasers in defence	4.46
4.16.5	Lasers in nuclear energy	4.47
4.16.6	Lasers in optical communications	4.47
4.16.7	Lasers in electronic industry	4.48
4.16.8	Lasers in consumer electronics industry	4.48
4.16.9	Optical data storage using compact disc	4.49
4.17	Holography	4.49
4.18	Fibre Optics	4.50
4.18.1	Principles of optical fibre	4.50
4.18.2	Acceptance angle	4.52
4.18.3	Numerical aperture	4.53
4.19	Types of Optical Fibres	4.55
4.19.1	Single and multimode fibres	4.56
4.19.2	Step index fibre	4.56
4.19.3	Graded index fibre	4.57
4.20	Modes in Optical Fibres	4.58
4.21	Dispersion	4.58
4.22	Losses in Fibres	4.59
4.22.1	Scattering losses	4.59
4.22.2	Absorption losses	4.60
4.22.3	Loss in decibel	4.60
4.23	Fibre Materials	4.61
4.23.1	Glass fibres	4.61
4.23.2	Plastic fibres	4.61
4.24	Fibre Optic Communication Systems	4.62
4.24.1	Light Sources for Fibre Optics	4.62
4.25	Modulation	4.62
4.26	Photodetectors	4.63
4.27	Functioning of Fibre Optic Communication System	4.64

5.9	Other Cubic Structures	5.31
5.9.1	Diamond cubic structure	5.31
5.9.2	Zinc sulphide or zinc blende cubic structure	5.32
5.9.3	Sodium chloride structure	5.33
5.9.4	Caesium chloride structure	5.33
5.10	Polymorphism and Allotropy	5.40
5.11	Crystal Imperfections	5.42
5.11.1	Point imperfections	5.42
5.11.2	Line imperfections	5.44
5.11.3	Screw dislocation	5.45
5.11.4	Surface imperfections	5.46
5.11.5	Stacking faults	5.46
5.11.6	Twin boundary	5.47
5.11.7	Volume defects	5.47
5.12	Conclusion	5.48
	<i>Short Questions and Answers</i>	5.57
	<i>Review Questions</i>	5.65
