Contents

Chapter 1 Highway Planning and Alignment	1.1 - 1.48
1.1 Role of Transportation in National Development	1.1
1.1.1 Definition and significance	1.1
1.1.2 Economic, social, spatial, cultural and political impacts of transportation	1.1
1.2 Macadam Method of Construction	1.2
1.2.1 Significant contributions	1.2
1.2.2 Construction steps	1.2
1.3 Highway Development in India	1.2
1.3.1 History of road development in India	1.2
1.3.2 Ancient period	1.3
1.3.3 Indus valley civilization	1.3
1.3.4 Indo aryan roads	1.3
1.3.5 Ashoka regime	1.3
1.3.6 Mughul period	1.3
1.3.7 British period	1.3
1.4 Jayakar Committee, 1927	1.4
1.4.1 Background	1.4
1.4.2 Recommendations	1.4
1.4.3 Realisation of the recommendations of the Jayakar committee	1.4
1.5 Trends and Pattern of Road Development in India & TamilNadu	1.8
1.6 Institutions for Highway Planning, Design, Construction, & Maintenance	1.10
1.6.1 Introduction	1.10
1.6.2 National level	1.11
1.6.3 Hierarchy of offices – state level	1.12
1.6.4 Local level	1.12
1.6.5 Overview of the institutional arrangement in a chronological order	1.13
1.6.6 Description of certain other institutions	1.13
1.7 On-going National Level Highway Development Projects	1.14
1.7.1 NHDP (Phase I to Phase VI)	1.14
1.7.2 Improvement in Riding Quality Programme (IRQP)	1.14
1.7.3 Removal of deficiencies on national highways	1.15
1.8 Highway Alignments-Obligatory Points	1.15
1.8.1 Definition and significance	1.15
1.8.2 Ideal requirements of alignments	1.15
1.8.3 Conflicts among ideal requirements	1.16

1.8.4	Factors controlling alignments	1.17
1.8.5	Obligatory points – definition and types	1.17
1.8.6	Hill pass	1.17
1.8.7	Road bridge across a river	1.18
1.8.8	Intermediate towns	1.18
1.8.9	Obligatory points through which an alignment should not pass through	1.19
1.8.10	Traffic	1.19
1.8.11	Geometric design elements	1.20
1.8.12	Economic factors	1.20
1.8.13	Other considerations	1.21
1.9	Engineering Surveys	1.21
1.9.1	Introduction	1.21
1.9.2	Objectives of four stages of engineering surveys	1.22
1.9.3	Data collected through different surveys	1.22
1.9.4	Provisional alignment identification (map study)-survey process	1.22
1.9.5	Reconnaissance survey- survey process	1.23
1.9.6	Preliminary survey- conventional method	1.24
1.9.7	Final location and detailed survey	1.25
1.9.8	Alignment of hill roads	1.25
1.9.9	Engineering surveys through modern methods	1.26
1.9.10	Re-alignment of highways	1.30
1.10	Road Classification in Rural and Urban Areas	1.31
1.10.1	Rural roads classification based on location and function	1.31
1.10.2	Expressways	1.31
1.10.3	National highways	1.32
1.10.4	State highways	1.33
1.10.5	Major district roads	1.33
1.10.6	Other district roads	1.33
1.10.7	Village roads	1.36
1.10.8	Urban roads classification based on location and function ...	1.36
1.10.9	Arterial	1.36
1.10.10	Sub-arterial	1.37
1.10.11	Collector street	1.37
1.10.12	Local street	1.38
1.10.13	Relevance of I.R.C. classification of rural and urban roads .	1.39
1.11	Cross Sectional Elements	1.39
1.11.1	Definition and importance	1.39
1.11.2	Right of Way (ROW)	1.40
1.11.3	Carriageway (CW)	1.40

1.11.4	Medians	1.41
1.11.5	Kerbs/Curbs	1.42
1.11.6	Camber	1.42
1.11.7	Shoulders	1.45
1.12	Road Margins	1.45
1.12.1	Elements	1.45
1.12.2	Parking lanes	1.45
1.12.3	Lay byes	1.45
1.12.4	Service roads	1.46
1.12.5	Bus bays	1.46
1.12.6	Cycle tracks	1.46
1.12.7	Foot path.....	1.46
	Revision Questions	1.47
Chapter 2 Geometric Design of Highways		2.1 - 2.54
2.1	Definition and Significance	2.1
2.2	Sight Distance	2.1
2.2.1	General	2.1
2.2.2	Stopping sight distance	2.2
2.2.3	Overtaking Sight Distance (O.S.D.)	2.9
2.2.4	Intermediate sight distance	2.14
2.2.5	Sight distance at intersections	2.14
2.3	Superelevation	2.16
2.3.1	Definition and expression	2.16
2.3.2	Analysis of superelevation	2.17
2.3.3	Equilibrium superelevation	2.18
2.3.4	Restriction on speed	2.19
2.3.5	Maximum superelevation	2.19
2.3.6	Minimum value of superelevation	2.19
2.3.7	Negative superelevation and its impact	2.19
2.3.8	Superelevation and camber	2.19
2.3.9	Superelevation design	2.21
2.4	Widening of Pavements on Curves	2.26
2.4.1	Reasons for widening	2.26
2.4.2	Off tracking	2.27
2.4.3	Analysis of extra widening	2.27
2.4.4	Methods of introducing extra widening	2.29
2.5	Transition Curve	2.31
2.5.1	Definition	2.31
2.5.2	Objective	2.31
2.5.3	Different types of transition curves	2.31

2.5.4	IRC Recommendation for shape	2.31
2.5.5	Length of transition curves	2.32
2.5.6	Shift of the transition curve	2.34
2.5.7	Situations and assumptions in transition curves	2.34
2.6	Design of Vertical Alignment	2.37
2.6.1	Definition and significance	2.37
2.6.2	Categories of gradient	2.38
2.6.3	Grade compensation	2.39
2.6.4	Class and purpose	2.39
2.6.5	Summit curves	2.39
2.6.6	Valley curves	2.40
2.7	Geometric Design of Hill Roads	2.41
2.7.1	General	2.41
2.7.2	Basic principles of geometric design	2.41
2.7.3	Definition of terms	2.43
2.7.4	Widths of ROW, Roadway, CW and shoulders	2.44
2.7.5	Camber	2.44
2.7.6	Passing places	2.45
2.7.7	Ease of slope and interception of drainage	2.46
2.7.8	Box cut	2.46
2.7.9	Zigs	2.46
2.8	Lateral and Vertical Clearances at Underpasses	2.48
2.8.1	Definition	2.48
2.8.2	IRC recommendations	2.48
	Revision Questions	2.50

Chapter 3 Design of Flexible and Rigid Pavements 3.1 - 3.74

3.1	Introduction	3.1
3.1.1	Definition	3.1
3.1.2	Need for highway pavement	3.1
3.1.3	Basic requirements of quality pavement	3.1
3.2	Types of Highway Pavements	3.2
3.3	Components and Their Functions	3.3
3.3.1	Components	3.3
3.3.2	Functions of soil subgrade	3.3
3.3.3	Functions of base and sub-base courses and their materials	3.3
3.3.4	Wearing course functions	3.4
3.4	Design Principles	3.4
3.5	Essential Difference between Rigid and Flexible Pavements	3.5
3.6	Design Factors	3.5

3.6.1	Factors to be considered in design of pavements	3.5
3.6.2	Design of wheel load	3.6
3.7	Design of Flexible Pavements - C.B.R Method (IRC:37-2001)	3.8
3.7.1	Introduction	3.8
3.7.2	Definition of CBR	3.9
3.7.3	California state highway department	3.9
3.7.4	C.B.R design method	3.9
3.7.5	Recommended method of design (IRC 37-2001)	3.10
3.7.6	Pavement thickness and composition	3.13
3.8	Guidelines for Design of Plain Jointed Rigid Pavements	3.35
3.8.1	Scope	3.35
3.8.2	Factors governing design	3.35
3.8.3	Design of slab thickness	3.41
3.8.4	Design of joints. (IRC: 58-2002)	3.62
3.8.5	Tie bars for longitudinal joints	3.65
	Revision Questions	3.71

Chapter 4 Highway Materials and Construction Practice 4.1 - 4.82

4.1	Introduction	4.1
4.2	Classification, Characteristics and Desirable Properties	4.1
4.2.1	Subgrade soil	4.1
4.2.2	Stone aggregates	4.2
4.2.3	Different types of bituminous materials	4.3
4.2.4	Tests on bitumen	4.4
4.3	CBR Test on Soil	4.5
4.3.1	Apparatus	4.5
4.3.2	Specimen	4.5
4.3.3	Soil sample	4.5
4.3.4	Statically compacted specimen	4.5
4.3.5	Dynamic compaction	4.5
4.3.6	Soaking of the specimen	4.6
4.3.7	Test procedure	4.6
4.3.8	Test analysis : CBR value	4.7
4.3.9	Criticism against CBR test	4.8
4.4	Tests on Aggregates	4.8
4.4.1	Tests for desirable properties	4.8
4.4.2	Crushing test	4.8
4.4.3	Abrasion test. (determination of los angels abrasion value) ..	4.10
4.4.4	Aggregate impact test	4.11
4.	Tests on Bitumen	4.13
4.5.1	Introduction	4.13

4.5.2	Penetration test for bitumen	4.13
4.5.3	Ductility test for bitumen	4.14
4.5.4	Viscosity test	4.15
4.5.5	Softening point test	4.16
4.6	Construction Practice	4.18
4.6.1	Introduction	4.18
4.6.2	Site clearance	4.18
4.6.3	Construction of embankments including sub grades, and earthen shoulders	4.18
4.6.4	Earth work over existing road surface	4.20
4.6.5	Sub-Bases, bases (non-bituminous) and shoulders	4.20
4.6.6	Water bound macadam sub-base / base	4.20
4.6.7	Wet mix macadam sub-base / base	4.22
4.6.8	Shoulders	4.24
4.6.9	Base and surface courses (bituminous)	4.24
4.6.10	Prime coat over granular base	4.26
4.6.11	Tack coat over granular base	4.27
4.6.12	Bituminous macadam	4.27
4.6.13	Bituminous penetration macadam	4.28
4.6.14	Dense bituminous macadam	4.28
4.6.15	Open – graded premix carpet	4.30
4.6.16	Semi-dense bituminous concrete	4.31
4.6.17	Bituminous concrete (asphalt concrete)	4.32
4.6.18	Seal coat	4.33
4.6.19	Bitumen mastic	4.34
4.6.20	Dry lean cement concrete sub-base	4.35
4.6.21	Plastic bituminous road	4.36
4.6.22	Cement concrete pavement	4.37
4.7	Modern Materials and Methods of Construction	4.38
4.7.1	Construction of fly ash embankments	4.38
4.7.2	Rubber modified bitumen in road construction	4.41
4.7.3	Geo-textiles	4.42
4.8	Highway Drainage	4.44
4.8.1	Definition and significance	4.44
4.8.2	Surface drainage – rural roads	4.45
4.8.3	Surface drainage – urban roads	4.47
4.8.4	Sub-surface drainage	4.50
4.8.5	Drainage in hill roads	4.53
4.9	Equipments for Road Construction and Maintenance	4.56
4.9.1	Introduction	4.56
4.9.2	Mechanical brooms	4.56

4.9.3	Binder distributors	4.57
4.9.4	Aggregate chip spreader	4.61
4.9.5	Combined bitumen and aggregate spreader	4.63
4.9.6	Pothole repairing machine	4.63
4.9.7	Rollers	4.64
4.9.8	Paver finisher	4.65
4.9.9	Use of equipment: precautions and proper maintenance	4.66
4.9.10	List of tools and equipment for concrete roads semi mechanized type of construction	4.69
4.9.11	List of tools and plants for fully mechanized concrete road construction	4.71
4.10	Urban Utility Services on Roads: Certain Guidelines	4.72
4.10.1	Location requirement of utility lines	4.72
4.10.2	Depth of service lines along roads	4.73
4.10.3	Location and space for services	4.73
4.10.4	Accommodation of utility lines across roads	4.74
4.10.5	Rein statement of trenches cut for accommodating utility services	4.77
4.10.6	Crossing through subways	4.78
4.10.7	Accommodation of utility lines across bridge structure	4.79
	Revision Questions	4.81

Chapter 5 Highway Maintenance 5.1 - 5.40

5.1	Introduction	5.1
5.1.1	Maintenance and its significance	5.1
5.1.2	Maintenance of flexible and rigid pavements	5.1
5.2	Typical Failures in Flexible Pavements	5.2
5.2.1	Types of failures	5.2
5.2.2	Failure in subgrade	5.2
5.2.3	Failure in sub-base or base Coarses	5.2
5.2.4	Failure of wearing course	5.3
5.3	Types of Defects in Flexible Pavements - Symptoms, Causes and Treatment	5.4
5.3.1	Surface defects	5.4
5.3.2	Cracks	5.5
5.3.3	Deformation	5.7
5.3.4	Disintegration	5.9
5.4	Methods of Repairing Defects of Bituminous Roads	5.11
5.4.1	Seal coat	5.11
5.4.2	Patching	5.12
5.4.3	Periodic renewals	5.13

5.4.4	Special problems	5.15
5.4.5	Materials and their uses	5.16
5.4.6	Filling pot-holes and patch repairs	5.18
5.4.7	Sealing of cracks with fog seal	5.19
5.4.8	Organisation and management	5.20
5.5	Repairs and Maintenance of Cement Concrete Pavements	5.20
5.5.1	Symptoms, causes and effects	5.20
5.5.2	Maintenance of cement concrete road	5.22
5.6	Pavement Evaluation	5.24
5.6.1	Introduction	5.24
5.6.2	Structural evaluation by benkelman beam methods	5.24
5.6.3	Evaluation of pavement surface condition	5.27
5.7	Highway Maintenance Activities	5.28
5.7.1	General	5.28
5.7.2	Basic maintenance objectives	5.28
5.7.3	Classification of maintenance activities	5.29
5.7.4	Planning of maintenance activities	5.29
5.8	Highway PROJECT Formulation	5.32
5.8.1	Technical appraisal report	5.32
5.8.2	Preliminary project report	5.32
5.8.3	Detailed project report	5.32
5.8.4	Check - list of item for a highway project report	5.33
	Revision Questions	5.34

Chapter - 6 Railways Planning and Design 6.1 - 6.80

6.1	Introduction	6.1
6.1.1	An overview	6.1
6.1.2	Characteristics of railways vis-à-vis other modes	6.1
6.2	Importance of Railways in National Development	6.3
6.2.1	Background	6.3
6.2.2	Economic significance	6.3
6.2.3	Political significance	6.4
6.2.4	Social significance	6.4
6.3	Factors Controlling Alignment	6.4
6.3.1	Introduction	6.4
6.3.2	Obligatory points	6.5
6.3.3	Traffic potential	6.6
6.3.4	Geometric design standards	6.7
6.3.5	Topography	6.7
6.3.6	Economic viability	6.10
6.3.7	Techno-economic characteristics	6.10

6.3.8	Other considerations	6.10
6.4	Engineering Surveys for Track Alignment	6.11
6.4.1	Introduction	6.11
6.4.2	Traffic surveys	6.11
6.4.3	Map study (fixing provisional alignment)	6.14
6.4.4	Reconnaissance survey	6.14
6.4.5	Preliminary survey	6.15
6.4.6	Final location and detailed survey	6.17
6.4.7	Engineering surveys through modern methods	6.18
6.4.8	Points for consideration while fixing alignments	6.23
6.4.9	Drawings for project formulation	6.24
6.4.10	Project report	6.25
6.5	Railway Track (Permanent Way)-Components and Functions	6.26
6.5.1	Introduction	6.26
6.5.2	Rails	6.26
6.5.3	Sleepers	6.32
6.5.4	Ballast	6.35
6.5.5	Sub grade	6.36
6.5.6	Typical cross sections	6.37
6.6	Geometric Design of Railway Tracks	6.39
6.6.1	Introduction	6.39
6.6.2	Gradient	6.39
6.6.3	Horizontal curves	6.42
6.6.4	Super elevation	6.47
6.6.5	Widening of gauges on curves	6.60
6.6.6	Transition curves	6.62
6.6.7	Summit and valley curves	6.71
	Review Questions.....	6.73

Chapter 7 Railway Tracks Construction, Maintenance and Operation

7.1 - 7.94

7.1	Introduction	7.1
7.2	Points and Crossing	7.2
7.2.1	Definition of terms	7.2
7.2.2	Trunouts	7.3
7.2.3	Methods of laying sleepers below points and crossings	7.6
7.2.4	Track junctions	7.7
7.3	Signalling and Interlocking	7.11
7.3.1	Introduction	7.11
7.3.2	Classification of signals	7.12
7.3.3	Description of different class of signals	7.13

7.3.4	Signaling system	7.20
7.3.5	Control of movement of trains	7.21
7.3.6	Interlocking	7.22
7.4	Track Circuiting	7.26
7.4.1	Definition	7.26
7.4.2	Working principle	7.26
7.4.3	Methods of track circuiting	7.26
7.4.4	Precautions to maintain track circuited area	7.26
7.5	Track Construction	7.26
7.5.1	Introduction	7.26
7.5.2	Land acquisition	7.27
7.5.3	Earth work for formation	7.27
7.5.4	Plate laying	7.30
7.5.5	Opening of sections for traffic	7.36
7.5.6	Doubling of railway lines	7.36
7.5.7	Gauge conversion	7.37
7.5.8	Realignment of curves	7.39
7.5.9	Railway electrification survey	7.40
7.5.10	High speed tracks	7.40
7.5.11	Rail joins	7.44
7.5.12	Elastic fastenings	7.44
7.5.13	Methods to increase the capacity of a railway track	7.45
7.6	Track Maintenance	7.47
7.6.1	Introduction	7.47
7.6.2	Essentials of good track maintenance	7.47
7.6.3	Conventional method of track maintenance	7.48
7.6.4	Mechanised method of track maintenance	7.53
7.6.5	Modern materials and methods of track construction and maintenance	7.57
7.7	Track Renewals	7.62
7.7.1	Introduction	7.62
7.7.2	Extension of track renewal or track relaying works	7.62
7.7.3	Mechanised track renewal	7.63
7.8	Railway Stations and Yards	7.64
7.8.1	Introduction	7.64
7.8.2	Site selection for railway stations and yards	7.65
7.8.3	Layouts of different types of stations	7.65
7.8.4	Functions of different types of yards	7.68
7.9	Passenger Amenities	7.71
7.9.1	Essential facilities at stations	7.71
7.9.2	Recommended amenities	7.72

7.9.3	Desirable amenities at different categories of stations	7.73
7.10	Characteristics of Different Modes of Transport	7.74
7.10.1	Introduction	7.74
7.10.2	Bus transport	7.75
7.10.3	Trolley buses	7.75
7.10.4	Tramways	7.75
7.10.5	Tube railways	7.75
7.10.6	Light rail transit systems	7.75
7.10.7	Suburban rail system	7.76
7.10.8	Mass rapid transit system	7.78
7.10.9	Rapid Transit System (RTS)/Mass Rapid Transit System (MRTS)/Metro Railways (MR):	7.81
7.10.10	Mono rail	7.81
7.10.11	Sky buses	7.82
7.10.12	Characteristics of different modes	7.83
7.10.13	Institutions for railway planning and construction	7.86
7.11	Station Equipment	7.87
7.11.1	Introduction	7.87
7.11.2	Turn table	7.87
7.11.3	Buffer stop	7.87
7.11.4	Derailing switch	7.88
7.11.5	Sand hump	7.88
7.11.6	Fouling mark	7.89
	Review Questions	7.89
Chapter 8 Airport Planning and Design		8.1 - 8.103
8.1	Introduction	8.1
8.1.1	Background	8.1
8.1.2	Airport classification	8.1
8.1.3	Air transport characteristics	8.2
8.2	Definitions of Terms and Standards	8.2
8.3	Airport Planning	8.5
8.3.1	Introduction	8.5
8.3.2	Socio-economic characteristics of catchment areas	8.6
8.3.3	Site selection for airports	8.6
8.3.4	Factor influencing size of an airport	8.7
8.3.5	Design and drawing of airport components	8.7
8.3.6	Cost estimation	8.8
8.3.7	Economic evaluation	8.8
8.4	Airport Site Selection	8.8
8.4.1	Introduction	8.8

8.4.2	Regional plan	8.9
8.4.3	Types of airports	8.10
8.4.4	Ground accessibility	8.10
8.4.5	Topography	8.10
8.4.6	Soil characteristics	8.11
8.4.7	Meteorological factors	8.11
8.4.8	Noise nuisance	8.12
8.4.9	On-site and off-site infrastructures	8.12
8.4.10	Shape and dimension of a site	8.12
8.4.11	Scope for future expansion	8.12
8.4.12	Comprehensive evaluation	8.13
8.4.13	Survey conducted and data collected	8.13
8.5	Airport Obstructions and Zones	8.13
8.5.1	Airport obstructions	8.13
8.5.2	Obstacle limitation requirements	8.17
8.5.3	Airport zones	8.18
8.6	Runway Design	8.21
8.6.1	Introduction	8.21
8.6.2	Orientation of runway	8.21
8.6.3	Cross wind component	8.22
8.6.4	Wind coverage	8.22
8.6.5	Calm period	8.23
8.6.6	Wind rose diagram – Type I	8.23
8.6.7	Wind rose diagram – Type II	8.24
8.6.8	Second runways	8.25
8.6.9	Worked out examples	8.25
8.6.10	Basic runway length	8.31
8.6.11	Actual runway length	8.31
8.6.12	Worked out examples	8.32
8.6.13	Runway geometric design elements	8.36
8.6.14	Runway configuration	8.42
8.6.15	Basic pattern of runways	8.42
8.6.16	Runway pavement design	8.44
8.6.17	Runway drainage	8.45
8.6.18	Correlation between aircraft characteristics and airport planning and design	8.45
8.7	Taxiway Design	8.46
8.7.1	Introduction	8.46
8.7.2	Taxiway geometric design elements	8.46
8.7.3	Strength of taxiways	8.49

8.7.4	Surface of taxiways	8.49
8.7.5	Rapid exit taxiways	8.49
8.7.6	Taxiways on bridges	8.50
8.7.7	Holding bays, taxi-holding positions and road-holding positions	8.50
8.7.8	Minimum distance from runway centre line to a holding-bay, taxi-holding position and road-holding positions	8.51
8.7.9	Taxiway minimum separation distances	8.51
8.7.10	Factors governing lay out of taxiways	8.53
8.8	Airport Components	8.53
8.8.1	Introduction	8.53
8.8.2	Apron	8.53
8.8.3	Terminal building	8.55
8.8.4	Passenger facilities and services	8.56
8.8.5	Hangars	8.59
8.8.6	Parking and circulation area	8.59
8.8.7	Typical airport layouts	8.64
8.8.8	Heliports	8.65
8.9	Visual Aids	8.68
8.9.1	Intorduction	8.68
8.9.2	Indicating devices	8.69
8.9.3	Runway markings	8.69
8.9.4	Taxiway markings	8.73
8.9.5	Aircraft stand markings	8.76
8.9.6	Apron safety lines location and application	8.76
8.9.7	Road holding position marking	8.76
8.9.8	Runway lightings	8.76
8.9.9	Taxiway lighting	8.84
8.9.10	Sign positions at taxiway/runway intersections	8.85
8.9.11	Visual aids for denoting obstacles	8.85
8.9.12	Visual aids for denoting restricted use of areas	8.90
8.9.13	Pre-Threshold area	8.90
8.10	Air Traffic Control (ATC)	8.91
8.10.1	Introduction	8.91
8.10.2	Primary functions of ATC	8.91
8.10.3	Air traffic control network	8.92
8.11	Runway Safety and Modern Technology in Air Transport	8.93
8.11.1	Wet runway	8.93
8.11.2	Slippery or contaminated runway	8.93
8.11.3	Impact of water depth on landing distance	8.93
8.11.4	Accidents due to wet runways	8.93

8.11.5	Modern technology in air transport	8.93
8.12	Modernisation of Airport Terminal at Delhi and Mumbai	8.94
	Review Questions.....	8.94
Chapter 9 Harbour Engineering and Other Modes		
	of Transport	9.1 - 9.83
9.1	Introduction	9.1
9.1.1	An over view	9.1
9.1.2	Significance of water transport	9.2
9.1.3	Advantages of water transport	9.2
9.1.4	Limitations of water transport	9.3
9.2	Definition of Terms	9.4
9.2.1	Harbour	9.4
9.2.2	Port	9.4
9.2.3	Docks	9.4
9.2.4	Tides	9.4
9.2.5	Waves	9.4
9.2.6	Satellite port	9.5
9.3	Requirements of Harbours.....	9.5
9.3.1	Principal requirements	9.5
9.3.2	Shelter	9.5
9.3.3	Accommodation	9.5
9.4	Classification of Harbours	9.6
9.4.1	Primary and subsidiary classification of harbours	9.6
9.4.2	Primary classification	9.6
9.4.3	Sub-divisional classification	9.8
9.5	Location of Harbours	9.9
9.5.1	Factors considered in site selection	9.9
9.5.2	Site investigation factors for location	9.10
9.6	Planning and Design of Harbours	9.13
9.6.1	Introduction	9.13
9.6.2	Area for free movement and depth	9.14
9.6.3	Harbour entrance	9.14
9.6.4	Entrance channel	9.14
9.6.5	Light house	9.15
9.6.6	Parking, loading and unloading space	9.15
9.6.7	Characteristics of vessels influencing harbour design	9.15
9.7	Harbour Layouts and Terminal Facilities	9.15
9.7.1	Terminal facilities	9.15
9.7.2	Historical evolution of chennai (Madras) harbour	9.16
9.7.3	Development of chennai (Madras) harbour	9.20
9.7.4	Ennore port	9.32

9.7.5	Intermediate and minor ports in Tamil Nadu	9.33
9.8	Docks	9.35
9.8.1	Definition and classification	9.35
9.8.2	Graving or dry dock	9.35
9.8.3	Floating dry dock	9.37
9.8.4	Wet dock	9.37
9.8.5	Comparison of floating dock and dry dock	9.38
9.9	Mooring and Mooring Accessories	9.38
9.9.1	Introduction	9.38
9.9.2	Mooring post	9.39
9.9.3	Bollard	9.39
9.9.4	Floating mooring buoys	9.39
9.10	Navigational Aids	9.40
9.10.1	Introduction	9.40
9.10.2	Types of navigation aids	9.40
9.10.3	Light house	9.40
9.10.4	Light signals	9.41
9.11	Coastal Structures	9.42
9.11.1	Piers	9.42
9.11.2	Breakwaters	9.43
9.11.3	Wharves	9.45
9.11.4	Jetties	9.45
9.11.5	Quays	9.48
9.11.6	Spring fenders	9.49
9.11.7	Dolphins	9.50
9.11.8	Landing stage and Floating Landing Stage (FLS)	9.50
9.12	Coastal Shipping	9.52
9.12.1	Introduction	9.52
9.12.2	Profile of SSCP	9.52
9.12.3	SSCP – new alignment	9.52
9.13	Inland Water Transport	9.53
9.13.1	Introduction	9.53
9.13.2	Decline of Inland Water Transport (IWT)	9.54
9.13.3	Revival of Inland Water Transport (IWT)	9.54
9.13.4	Revitalization of IWT in cities	9.56
9.14	Pipe Ways and Rope Ways	9.56
9.14.1	Pipe ways	9.56
9.14.2	Rope ways	9.57
9.15	Waves and their Action on Coastal Structures	9.57
9.15.1	Types of waves	9.57
9.15.2	Wave action	9.57

9.15.3	Beach building phenomena	9.58
9.15.4	Littoral drift	9.59
9.15.5	Effect of waves on coastal structures.....	9.62
9.15.6	Wave action on coastal structures-case studies	9.63
9.16	Environment Concern in Port Operations	9.66
9.16.1	Environment impact of ports	9.66
9.16.2	Effect of tsunami waves on marine life and eco-system	9.67
9.17	Coastal Regulation Zones (CRZ)	9.67
9.17.1	Definition of terms	9.67
9.17.2	Activities prohibited with in CRZ	9.67
9.17.3	Regulation of permissible activities	9.68
9.17.4	Coastal Zone Management Plan (CZMP)	9.68
9.17.5	Norms and guidelines for development of beach resorts / Hotels in CRZ III	9.68
9.17.6	Classification of CRZ	9.69
9.18	Coastal Protection Works	9.71
9.18.1	Introduction	9.71
9.18.2	Types of coastal protection works	9.71
9.18.3	Protection against natural calamities	9.79
	Review Questions.....	9.81

Chapter 10 Economic Evaluation of Transport Projects 10.1 - 10.31

10.1	Introduction	10.1
10.1.1	Objectives of economic evaluation	10.1
10.1.2	Methods of economic evaluation	10.1
10.1.3	Environmental impact	10.1
10.1.4	BOT projects	10.2
10.2	Evaluation of Highway and Railway Projects	10.2
10.2.1	Introduction	10.2
10.2.2	Cost and benefits of projects	10.2
10.2.3	Stages in cost-benefit analysis	10.3
10.2.4	Basic principles of economic evaluation	10.4
10.2.5	Types of evaluation techniques	10.5
10.2.6	Versions of CBA	10.6
10.2.7	Methods of economic evaluation	10.8
10.2.8	Worked out examples under economic evaluation of highway and railway projects	10.10
10.3	Environmental Impact Assessment.....	10.15
10.3.1	Introduction	10.15
10.3.2	Environmental impact assessment	10.15
10.3.3	Positive and negative impacts of transport projects	10.21

10.3.4	Environmental management plan for projects	10.21
10.4	Build, Operate and Transfer (B.O.T) Concept	10.22
10.4.1	Introduction	10.22
10.4.2	Case study of B.O.T projects	10.23
10.4.3	Merits and de-merits of B.O.T projects	10.24
10.4.4	Parameters for award of contract under existing concept:	10.25
10.4.5	Revised model	10.25
10.4.6	First six lane B.O.T project	10.25
10.4.7	Conclusion	10.26
10.5	Cash Flow Analysis	10.26
10.5.1	Introduction	10.26
10.5.2	Basic principles for measuring project cash flows	10.27
	Review Questions	10.29
