Contents

Chapter 1 Engineering Ethics 1.1 - 1.30

- Introduction
- Definition of 'Engineering Ethics'
- Sense of 'Engineering Ethics'
- Variety of Moral Issues
- Types of Inquiry
 - Normative inquiries
 - Conceptual inquiries
 - Factual inquiries
- Moral Dilemmas
 - Problems of vagueness
 - Problems of conflicting reasons
 - Problems of disagreement
- Moral Autonomy
- Theories on Moral Autonomy
 - Lawrence Kohlberg's Theory
 - Carol Gilligan's Theory
- Consensus and Controversy
- Profession, Professional and Professionalism
 - Knowledge
 - Organization
 - Public good
 - Honours of engineering profession
 - Liabilities of engineering profession
 - Professional ideals and virtues
 - Aristotle theory
 - Mac Intyre theory
- Professional Responsibility
 - Self-direction virtues
 - Public spirited virtues
 - Team work virtues
 - Profeiciency virtues
- Use of Ethical Theories

Chapter 2 Engineering as Social Experimentation 2.1 - 2.15

- Introduction
- Engineering as Experimentation
- Engineers as Responsible Experiments

- Conscientiousness
- Relevant information
- Moral autonomy
- Accountability
- Codes of Ethics
 - Professional societies or professional bodies
 - Role of codes
 - Limitation of codes
- A Balanced Outlook on Laws
- Industrial Standards
- Challenger Disaster - A Case Study

Chapter 3 Engineers Responsibility for Safety 3.1 - 3.14

- Introduction
- Safety and Risks
 - The concept of safety
 - Risks
- Assessment of Safety and Risk
 - Uncertainties in design
 - Testing for safety
- Risk Benefit Analysis
 - Personal risks
- Reducing Risks
 - Examples of improved safety
 - Chernobyl nuclear reactor plant disaster case study

Chapter 4 Responsibilities and Rights 4.1 - 4.23

- Respect for Authority
- Collective Bargaining
 - Good and bad aspects of a union
- Confidentiality
 - Definition
 - Confidentiality related terms
- Conflict of Interest
 - Conflicting interest
 - Gifts and Bribes
- Occupational Crimes
 - Types of occupational crimes
- Professional Rights
- Employees Rights
- Intellectual Property Rights (IPR)
- Discrimination

Chapter 5 Global Issues

5.1 -5.31

- Introduction
- Multinational Corporations
 - International human rights
 - When in Rome, do as the Romans do
 - Promoting morally just measures
 - Technology transfer and appropriate technology
 - Bhopal tragedy or bhopal disaster
- Environmental Ethics
 - Acid rain
 - Air and water pollution
 - Pollution due to asbestos industries
 - Land subsidence
- Computer Ethics
 - Power relationships
 - Property
 - Privacy
- Weapons Development
 - The weapons sea-saw
 - Engineers involvement in weapons work
- Engineers as Managers
- Engineers as Professionals
- Consulting Engineers (Engineers as Consultants)
 - Advertising
 - Competitive bidding
 - Contingency fees
 - Resolution of disputes
- Engineers as Expert Witness and Advisors
 - Hired guns
 - Financial biases
 - Ego biases
 - Sympathy biases
 - Moral Leadership
 - Morally creative leaders
 - Professional societies
 - Participation in professional societies
- Code of Ethics by the Institution of Engineers, India-IE(I)

Professional Ethics in Engineering

Second Edition

This book stresses the importance of how an individual transforms the society by practicing the ethical values of highest moral standards. Engineer, as a professional, is bound to commit mistakes when he experiments. This experimentation consumes enormous amount of time, human lives, and money. To serve the society and to avoid tragedy and losses, the engineers have to necessarily follow the ethical standards while arriving at a decision.

This book is intended as a textbook, written in accordance with the revised syllabus by the Anna University, Chennai. Written lucidly and packed with the organized presentation of the information, each chapter contains the Glossary, short answer questions and review questions.

Prof. Raghavan M.P did his B.E in Civil Engineering at CIT, Coimbatore in 1966 and subsequently his M.Tech (Hydraulic Engineering) in Civil Engineering from IIT Madras. He joined Technical Education Service and has worked in various capacities as Lecturer, Assistant Professor and Professor in various reputed Engineering Colleges.

Currently he is working as Director (Academic), S.R.I. College of Engineering and Technology, Vandavasi.

In his 45 years of teaching experience, he has taught subjects like Fluid Mechanics, Fluid Machinery, Hydrology, Coastal Engineering, Irrigation Engineering, Hydraulic Structures, Surveying and Professional Ethics.
