# **Statistics and Numerical Methods**

**Second Edition**

**Dr.K.Subramani**

Assistant Professor

**Dr.A.Santha**

Associate Professor, Department of Mathematics  
Sri Shakthi Institute of Engineering and Technology  
Coimbatore - 641 062

Publishing for future

**SCITECH PUBLICATIONS (INDIA) PVT. LTD.**

## Contents

<b>Chapter - 1</b>	<b>Tests of Hypothesis</b>	<b>1.1 - 1.110</b>
1.1	Introduction . . . . .	1.1
1.1.1	Parameter and statistic . . . . .	1.1
1.1.2	Sampling distribution and sampling error . . . . .	1.2
1.1.3	Uses of standard error . . . . .	1.2
1.1.4	Testing of hypothesis . . . . .	1.3
1.1.5	Tests of significance . . . . .	1.3
1.1.6	Type I and Type II errors . . . . .	1.4
1.1.7	Critical region and level of significance . . . . .	1.5
1.1.8	One tailed and two tailed tests . . . . .	1.5
1.1.9	Critical values or significant values . . . . .	1.6
1.1.10	Procedure for testing the hypothesis . . . . .	1.7
1.2	Tests of Significance for Large Sampling Theory . . . . .	1.8
1.3	Testing of Hypothesis about a Population Proportion . . . . .	1.8
1.4	Testing Hypothesis about the Difference between Two Proportions . . . . .	1.19
1.5	Testing Hypothesis about Population Mean . . . . .	1.30
1.6	Testing Hypothesis about the Difference between Two Means . . . . .	1.35
1.7	Testing Hypothesis about the Difference between Two Standard Deviations . . . . .	1.46
1.8	Tests of Significance for Small Sampling Theory . . . . .	1.52
1.9	Test of Hypothesis about the Population Mean . . . . .	1.55
1.10	Test of Hypothesis about the Difference between Two Means (Using t-test) . . . . .	1.60
1.11	Paired t-Test for Difference of Means . . . . .	1.67
1.12	Testing the Hypothesis for Equality of Two Variances . . . . .	1.73
1.13	Chi-Square Distribution . . . . .	1.80
1.14	$\chi^2$ - Test of Goodness of Fit . . . . .	1.81
1.15	$\chi^2$ - Test of Independence of Attributes . . . . .	1.90
1.16	Chi-Square Test for a Population Variance . . . . .	1.99
<b>Chapter - 2</b>	<b>Design of Experiments</b>	<b>2.1 - 2.60</b>
2.1	Completely Randomized Design (CRD) (or) One - Way Classification . . . . .	2.5
2.2	Randomised Block Design (RBD) (or) Two-Way Classification . . . . .	2.17
2.3	Latin Square Design (LSD) . . . . .	2.34
2.4	Factorial Designs . . . . .	2.46

**Chapter-3 Solution of Equations and Eigen Value Problems**

**3.1 - 3.64**

3.1	Algebraic Equations . . . . .	3.1
3.2	Transcendental Equations . . . . .	3.1
3.3	Root of an Equation . . . . .	3.1
3.4	Fundamental Theorem of Algebra . . . . .	3.1
3.5	Newton Raphson method (Newton's iteration method) . . . . .	3.2
3.5.1	Convergence of Newton's method . . . . .	3.3
3.5.2	Geometrical interpretation of Newton's method . . . . .	3.4
3.6	Solution of System of Linear Algebraic Equations . . . . .	3.16
3.6.1	Direct methods . . . . .	3.16
3.6.2	Iterative methods (Indirect methods) . . . . .	3.29
3.7	Eigen Values and Eigen Vectors . . . . .	3.47

**Chapter-4 Interpolation, Numerical Differentiation and Numerical Integration**

**4.1 - 4.79**

4.1	Interpolation . . . . .	4.1
4.1.1	Preliminaries . . . . .	4.1
4.1.2	Properties of finite difference operators . . . . .	4.4
4.1.3	Interpolation with equal intervals . . . . .	4.5
4.2	Interpolation with unequal interval . . . . .	4.20
4.2.1	Divided differences . . . . .	4.20
4.2.2	Newton's divided difference formula . . . . .	4.27
4.2.3	Lagrange's interpolation formula . . . . .	4.33
4.2.4	Inverse interpolation . . . . .	4.39
4.3	Numerical Differentiation . . . . .	4.43
4.3.1	Newton's forward difference formula to compute the derivatives . . . . .	4.42
4.3.2	Newton's backward differences formula to compute the derivatives . . . . .	4.44
4.3.3	Maxima and minima of the interpolating polynomial . . . . .	4.45
4.4	Numerical Integration . . . . .	4.59
4.4.1	Quadrature formula for equidistant ordinates (or Newton - Cot's formula) . . . . .	4.59
4.4.2	Trapezoidal Rule . . . . .	4.60
4.4.3	Error in Trapezoidal rule . . . . .	4.61
4.4.4	Simpson's one-third rule . . . . .	4.62
4.4.5	Error in Simpson's one-third rule . . . . .	4.62
4.4.6	Simpson's three-eighth rule . . . . .	4.63
4.4.7	Error in Simpson's $\frac{3}{8}$ - rule . . . . .	4.63

<b>Chapter -5</b>	<b>Numerical Solution of Ordinary Differential Equations</b>	<b>5.1 - 5.72</b>
5.1	Introduction . . . . .	5.1
5.2	Taylor's Series Method . . . . .	5.2
5.3	Euler's Method . . . . .	5.10
5.4	Modified Euler's Method . . . . .	5.17
5.5	Runge - Kutta Methods . . . . .	5.26
5.6	Runge - Kutta Method for Simultaneous First Order Equations . . . . .	5.35
5.7	Fourth Order Runge - Kutta Method for Solving Second Order Ordinary Differential Equation . . . . .	5.38
5.8	Predictor - Corrector Methods . . . . .	5.45
5.9	Boundary Value Problems . . . . .	5.59
5.10	Exercise . . . . .	5.67
	<b>Appendix</b>	<b>A.1 - A.6</b>
	<b>Index</b>	<b>I.1 - I.2</b>
	<b>Bibliography</b>
