

Wireless Communication

Dr. M. Kathirvelu

Professor & Head

Department of Electronics & Communication Engineering
KPR Institute of Engineering and Technology
Arasur, Coimbatore - 641 407.

V. Chandra Prasad

Assistant Professor

Department of Electronics & Communication
KPR Institute of Engineering and Technology
Arasur, Coimbatore - 641 407.

S. Finney Daniel Shadrach

Assistant Professor

Department of Electronics & Communication
KPR Institute of Engineering and Technology
Arasur, Coimbatore - 641 407.

Publishing for future

SCITECH PUBLICATIONS (INDIA) PVT. LTD.

Contents

Chapter 1	Wireless Channels	1.1 - 1.43
1.1	Introduction	1.1
1.2	Large Scale Path Loss	1.1
1.2.1	Free space propagation model	1.3
1.2.2	Propagation model	1.6
1.3	Link Budget Design	1.16
1.3.1	Practical link budget design using path loss models	1.19
1.4	Small Scale Fading	1.22
1.4.1	Doppler shift	1.22
1.4.2	Factors influencing small-scale fading	1.24
1.5	Parameters of Mobile Multipath Channels	1.24
1.5.1	Time dispersion parameters	1.24
1.5.2	Coherence bandwidth	1.25
1.5.3	Doppler spread and coherence time	1.26
1.6	Types of Small-Scale Fading	1.26
1.6.1	Fading due to multipath time delay spread	1.27
1.6.2	Fading effects due to doppler spread	1.29
	<i>Short Questions with Answers</i>	1.39
	<i>Review Questions</i>	1.43
Chapter 2	Cellular Architecture	2.1 - 2.34
2.1	Multiple Access Techniques	2.1
2.1.1	FDMA	2.1
2.1.2	Features of FDMA	2.2
2.1.3	TDMA	2.3
2.1.4	CDMA	2.6
2.2	Cellular Concept	2.7
2.2.1	Frequency reuse	2.8
2.2.2	Channel assignment	2.11
2.2.3	Hand off	2.11
2.2.4	Interference and system capacity	2.14
2.2.5	Trunking and grade of service	2.17

2.2.6 Coverage and capacity improvement	2.19
<i>Solved Problems</i>	2.22
<i>Short Questions with Answers</i>	2.28
<i>Review Questions</i>	2.34

Chapter 3 Digital Signalling for Fading Channels 3.1 - 3.56

3.1 Introduction	3.1
3.2 Structure of a Wireless Communication Link	3.3
3.2.1 Detailed block diagram of digital transmitter and receiver	3.5
3.2.2 Mathematical link model for analysing modulation schemes (simplified model)	3.8
3.3 Geometric Representation of Modulation Signals	3.8
3.4 Digital Modulation Techniques	3.11
3.5 Linear Modulation	3.11
3.5.1 Quadrature Phase Shift Keying (QPSK)	3.12
3.5.2 Offset QPSK (OQPSK)	3.17
3.5.3 $\frac{\pi}{4}$ QPSK; ($\frac{\pi}{4}$ Quadrature phase shift keying)	3.19
3.6 Non - Linear Modulation	3.23
3.6.1 Binary Frequency Shift Keying (BFSK)	3.24
3.6.2 Minimum Shift Keying [MSK]	3.27
3.6.3 Gaussian Minimum Shift Keying (GMSK)	3.30
3.7 Error Performance in Fading Channels	3.33
3.7.1 Error performance in slow flat - fading channels	3.34
3.7.2 Error performance in frequency selective fading channels	3.36
3.8 Orthogonal Frequency Division Multiplexing [OFDM]	3.37
3.8.1 Principle behind OFDM techniques	3.38
3.8.2 Implementation of transceiver sections	3.39
3.8.3 Advantages of OFDM	3.42
3.8.4 Disadvantages of OFDM	3.42
3.8.5 Cyclic Prefix (CP)	3.42
3.8.6 Peak - to - Average Power Ratio (PAPR)	3.44
<i>Solved Problems</i>	3.45
<i>Short Questions with Answers</i>	3.47
<i>Review Questions</i>	3.55

Chapter 4	Multipath Mitigation Techniques	4.1 - 4.39
4.1	Introduction	4.1
4.2	Equalization	4.1
4.3	Adaptive Equalizers	4.2
4.3.1	Block diagram of a communication system with an adaptive equalizer at receiver end	4.2
4.3.2	Basic structure of an adaptive equalizer, during training	4.3
4.4	Equalization Techniques	4.5
4.5	Types of Equalizers	4.8
4.5.1	Linear equalizers	4.8
4.5.2	Non - Linear equalizers	4.11
4.6	Algorithm for Adaptive Equalization	4.14
4.6.1	Factors influencing the performance of an adaptive algorithm	4.14
4.6.2	Equalizer algorithms	4.15
4.7	Diversity	4.19
4.8	Classification of Diversity Techniques	4.20
4.8.1	Space diversity	4.20
4.8.2	Frequency diversity	4.27
4.8.3	Polarization diversity	4.27
4.8.4	Time diversity	4.29
	<i>Solved Problems</i>	4.30
	<i>Short Questions with Answers</i>	4.32
	<i>Review Questions</i>	4.38
Chapter 5	Multiple Antenna Techniques	5.1 - 5.39
5.1	MIMO Systems. [Multiple Input Multiple Output]	5.1
5.1.1	Comparison between MIMO and smart antenna	5.3
5.1.2	MIMO - System architecture	5.3
5.1.3	Advantage of MIMO	5.5
5.1.4	Disadvantages	5.5
5.1.5	Applications	5.5
5.2	Spatial Multiplexing and System Model	5.5
5.2.1	Shannon's Law	5.6
5.2.2	Space-Time Processing (STP)	5.8
5.3	Beam-Forming	5.10

5.3.1	Beam-forming techniques	5.10
5.3.2	Beam-forming schemes	5.11
5.3.3	Application	5.11
5.4	Precoding	5.12
5.4.1	Precoding for Single user MIMO system	5.12
5.4.2	Precoding for multi user MIMO system	5.13
5.5	Diversity	5.13
5.5.1	Classes of diversity schemes	5.14
5.5.2	Space diversity	5.14
5.5.3	Transmit diversity	5.19
5.6	Channel State Information	5.19
5.6.1	Different kinds of channel state information	5.20
5.6.2	Mathematical description	5.20
5.6.3	Classification of channel estimation techniques	5.21
5.7	Channel Capacity	5.21
5.7.1	AWGN Channel capacity	5.22
5.7.2	Linear time-invariant Gaussian channels	5.24
5.7.3	Capacity of fading channels	5.29
	<i>Short Questions with Answers</i>	5.35
	<i>Review Questions</i>	5.38

University Question Papers

UQ.1 - UQ.10
